

Como obter JOB da fase SDAKDL02 do TSOB

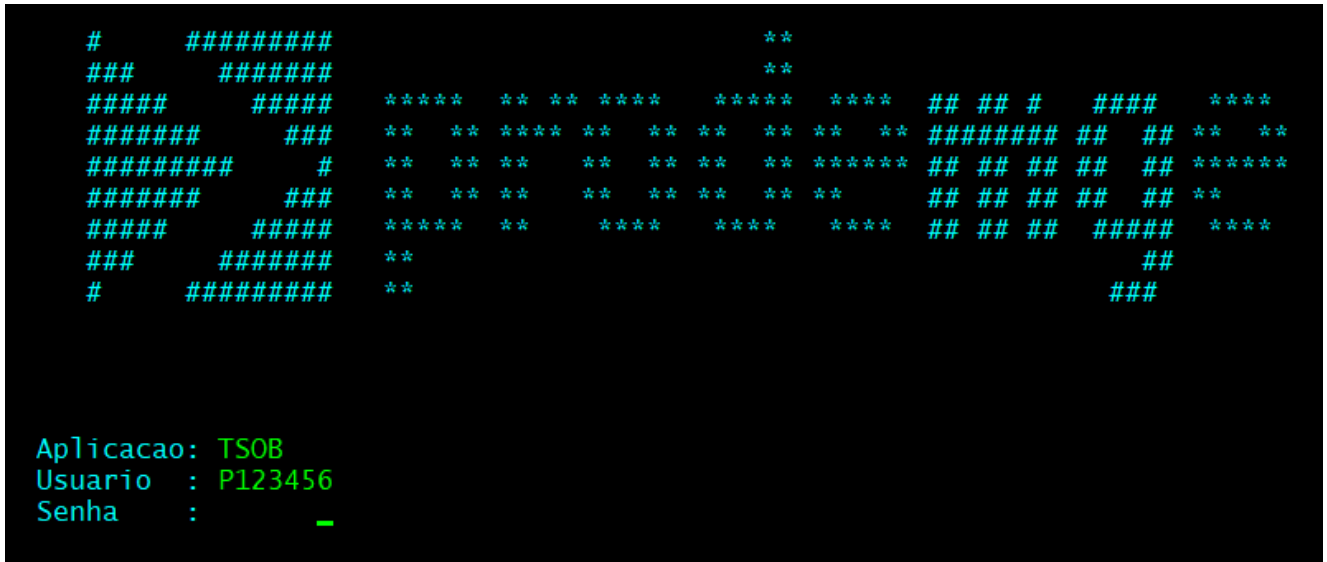

1. Abrir o programa **pw3270** disponível na área de trabalho do Windows.

Caso não exista um atalho do programa na área de trabalho, acessar: **C:\Arquivos de Programas (x86)\pw3270**

2. Logar no TSOB:

3. Entrar na opção **C.S (ENTER)** → Será então exibida a tela "CA VIEW" → **(ENTER)**.

- No campo 'Select By', digitar a letra "R" → **(ENTER)**.

```

CA View SARO -- Primary Selection for VIEW.R122.JCLLOG -----
Sysout ID      ===> SDAKDL02*
Select By      ===> R                               (R, I, IL, or IR)
Index Name     ===>                               Value ===>
               ===>                               ===>
               ===>                               ===>
               ===>                               ===>

Selection Criteria:
  Generation   ===> *                               (*, ALL, specific (n), relative (-n),
                                                    range (n:m or -n:m))

  Date         ===>                               (specific (mm/dd/yyyy), relative (-n),
                                                    range(mm/dd/yyyy:mm/dd/yyyy or -n:m))

Selection Options:
  Exceptions   ===> X exceptions only, NX non exceptions only, AX/(blank) any
  Permanent    ===> P permanent only, NP non permanent only, AP/(blank) any

Enter END command to terminate this CA View session.

Command ===>

```

5. Observar então a data desejada no campo 'Arch Date', e assim obter o JOB no campo 'Jobid' (atentar no formato de visualização da data, que está em formato americano, sendo mostrado 'Mês/Dia/Ano').

Ex.: Fase 'SDAKDL02' do dia 20/01/2022, o JOB será '6615'.
